DW-D59F FLAME RETARDANT SUIT

Technical Specification and Certificate of Conformity

The fabric that we are offering is our D59F, a 100% cotton satin weave with a finished mass of 310 - 320 gm/m². We do not offer a lighter fabric in a flame retardant finish because the F.R finish reduces the strength of the fabric, which on a lighter weaker fabric would be an unacceptable level. The D59F retains a tensile strength of over 500 Newtons, which is above the SABS specification for this workwear fabric (SABS Type D59).

The F.R chemical finish we use is Aflammit KWB from Thor Chemicals (the South African division being Acti Chem). This chemical, which reacts with the cotton fibre to produce a permanent co-valent bond, is used internationally to produce a wash fast Flame Retardant finish that lasts the life of the garment.

COMPLIANCY

SABS 1423-1/1987 as well as the BS EN 531, BS EN 533 and BS EN 470-1.

CONFORMITY

SABS 434 mark bearing, SANS 1387:2009 and SANS 1423-1:2008 cat 1 aflammit retardant fabric.

PACKAGING & STORAGE

Packed 20 suits per carton, sizes from 32 to 56 in Jackets and Pants.

SPECIAL INSTRUCTIONS

Garments of Da Gama™ brand can be cleaned by home or commercial laundering or by inherent protective features at no more than 90°.

The following suggestions will keep your garment looking neat, attractive and safe.

If home procedures do not remove contaminants. Commercial laundering or dry cleaning is recommended.

Launder garments of Da Gama™ separate from personal non-flame resistant clothing to help avoid contamination by flammable materials. Pre-treat greasy stains and collar/cuff lines. Wash garment in hot water with a light dry cleaning solvent.

Do not use Hypochlorite Bleach or detergents containing Hypochlorite Bleach. Chlorine bleach may cause fading and reduce fabric strength. The wash care instructions of Do not bleach should therefore be followed.
